

**COPYING CW WITH A SPEAKER CAN BE A PROBLEM THERE IS LOSS IN LOUDNESS AS SOUND TRAVELS FROM SPEAKER TO EARS OTHER SOUNDS CAN INTERFERE WITH A HEADSET THAT FITS OVER ONES EARS IT CAN BLOCK OUT OTHER SOUNDS AND IS MORE COMFORTABLE BECAUSE IT DOES NOT PRESS AGAINST THE OUTER EAR A WIDE FREQUENCY RESPONSE IS GOOD FOR LISTENING TO MUSIC BUT UNNECESSARY FOR CW A HEADSET THAT WORKS WELL OVER A FREQUENCY OF 200 TO 800 HZ CAN PROVIDE GOOD CW REPRODUCTION WHILE REDUCING HIGH FREQUENCY AND LOW FREQUENCY AUDIO SOUNDS**
